PUBLIC NOTICE  
IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER  
Monitoring Requirements Not Met for Dane Waterworks

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. Between 05/01/2022 and 05/31/2022, we did not monitor for coliform bacteria, and therefore cannot be sure of the quality of your drinking water during that time.

**What precautions should be taken at this time?**

There are no special precautions you need to take at this time. However, it is important remember that the quality of your drinking water during this period is not known at this time.

**What was the cause of the missed sample?**

An error in the collection and reporting process occurred during the second half of May.

**What is being done to correct the problem?**

We have updated our computer program and collection process to avoid this from happening in the future.

**When will the problem be resolved?**

The problem was resolved on 06/07/2022 as we were back on track for normal monitoring and sampling. Both the sample results before and after the missed sample were clear of any contamination.

**If you have any questions regarding the safety of our drinking water, please contact me.**

Sincerely,

Shane Clapper  
Director of Public Works  
Village of Dane  
(608)849-5425

I certify that the information and statements contained in this public notice are true and correct and have been provided to consumers in accordance with the delivery, content, format, and deadlines required in Subchapter VII of ch. NR 809, Wis. Adm. Code.
